INSECTICIDES

Don't mix with OP insecticides, as potential crop damage due to a counteraction of the safener, leave at least a 14 day interval

Decis Protech	www	Markate 50				
KARATE ZEON	www	Sumi-Alpha				

ADJUVANTS

ACTIVATOR 90 - 0.1% of spray vol		BOOST		TORPEDO II - 0.1% of spray vol	
BIOPOWER - 1.0 l/ha		KANTOR - 0.15% of spray vol		Validate - 0.5% of spray vol	
BIO SYL - 1.0% of spray vol		Surfer - 0.5% of spray vol			

PLANT GROWTH REGULATORS

Leave 7 day interval for full rate PGRs. When tank mixing use Broadway Star + adjuvant plus half rate CCC only.†

7C CHLORMEQUAT (half dose)†	www	CERONE		TERPAL	
CANDPY	www	MODDUS			

TRACE ELEMENTS

For liquid fertilisers - leave a three day interval

This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience[™] gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk. **Important Note:** Do not use any tank-mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank-mix restrictions apply. Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteva representative or call the Hotline on 0800 689 8899. Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience[™] cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience[™] has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

NOTES:

Broadway Star should always be used with an approved adjuvant.
Do not mix Broadway Star With OPs, MCPA and Dicamba.
For products containing MCPA or Dicamba respect a 14 day interval between them and Broadway Star.
Do not harrow or roll within 7 days before or after an application of Broadway Star.

KEY:

*Sword is supported in mix with Broadway Star up to the end of February.
*Residual herbicides can be used in mixture or short sequence with Broadway Star, while conditions are favourable for both products to work and weeds are small and actively growing. However, once soil moisture declines to reduce residual activity then a 4 week interval between the residual herbicide and an application of Broadway Star is recommended to maximise grass weed control and the tank-mix is no longer supported.
*Do not exceed maximum total dose of florasulam within growing season.
**Do not use this mix if the crop is under stress as there is the increased risk of an additive PGR effect and possible crop damage.
*Corteva Agriscience only support Broadway Star in a 2-way tank mix with half rate chlormequat due to crop safety issues. An interval of at least 7 days must be regarded before applying a higher rate of chlormequat or any other PGR.

Use plant protection products safely. Always read the label and product information before use.

PAY ATTENTION TO THE RISK INDICATIONS AND FOLLOW THE SAFETY PRECAUTIONS ON THE LABEL.
