

2026 SUNFLOWER

UNITED STATES PRODUCT USE GUIDE

Introduction

This 2026 Product Use Guide provides technical information about Corteva Agriscience™ sunflower products and sets forth requirements and guidelines for the use of these products. Please read all of the information pertaining to the technology you will be using, including stewardship and related information.

This technical guide is not a pesticide product label. It is intended to provide additional information and to highlight approved uses from certain product labels. Read and follow all precautions and label instructions on any agricultural or pesticide products that you are using.

Not all products described in this Product Use Guide are available in all brands or in all states.

Stewardship Overview

A Message About Stewardship

Corteva Agriscience is committed to the responsible management of all its seed products.

By accepting delivery of any Corteva Agriscience product, growers are contractually obligated to comply with all laws, regulations, and Corteva Agriscience stewardship requirements described in Product Use Guide(s) and any product-specific stewardship requirements, as each may be amended from time to time by Corteva Agriscience.

Proper stewardship of Corteva Agriscience products is beneficial to growers and other stakeholders, including enabling continued grower access to Corteva leading germplasm and biotechnology traits in seed products and helping to enhance grower productivity and profitability. Proper stewardship also promotes responsible use of these products, such as mitigating potential resistance development to enhance long-term durability of Corteva Agriscience technologies. When combined with best management practices, Corteva Agriscience products provide options for growers and their customers. To help enable grower success and protect Corteva technologies, growers must agree and understand the stewardship requirements, such as potential grain use restrictions, including but not limited to:

- Sign and comply with the Corteva Agriscience Technology Use Agreement (TUA), which may be amended from time to time. Signing the TUA permits access to the Corteva Agriscience germplasm and the biotech trait technologies in Corteva Agriscience seed products.
- Follow Stewardship requirements detailed in Product Use Guide(s), (www.corteva.us/Resources/trait-stewardship.html) and on product-specific labels.
- Read and follow all seed, pesticide, or other product labels and information.
- Implement appropriate product-specific Insect Resistance Management (IRM) and/or Herbicide Resistance Management (HRM) practices, as required by Corteva Agriscience and the U.S. Environmental Protection Agency (EPA). Following IRM and HRM requirements helps limit development of insect and herbicide resistance and helps to maintain the long-term durability of these technologies.
- Use of Corteva Agriscience seed products solely for producing a single commercial crop encourages the development of better, high yield potential germplasm and additional technologies and innovations, further improving agricultural productivity.
- Growers are required to discuss trait acceptance and grain purchasing policy with the grain purchaser or grain handler prior to the delivery and sale of crop products (e.g., grain or other plant material containing biotech traits) and only deliver grain to a purchaser or grain handler that agrees grain and by-products will be marketed in markets where such products are authorized for the specific use. For more detailed information on the status of a trait or product, please visit www.biotradestatus.com.
- Follow any additional stewardship requirements that Corteva Agriscience deems necessary for a particular product (e.g., grain or feed use or geographical planting restrictions, or use of an authorized herbicide).
- Any forward-looking statements made by Corteva Agriscience related to regulatory approval timelines by their nature address matters that are, to different degrees, uncertain. Any forward-looking statements of anticipated regulatory authorization timelines are not guarantees of government agency action and are based on certain assumptions and expectations of future events that may not be realized.
- Contact your local sales professional for more information.

By using Corteva Agriscience products, growers further understand and agree that (1) all crops and materials containing biotech traits (e.g., grain) may only be (a) exported, transferred or moved to or (b) used, processed, or transferred in jurisdictions where all necessary regulatory authorizations have been granted for those crops and materials for such activities, (2) it may be unlawful to export, transfer, or move materials containing biotech traits across borders into jurisdictions where their import and use is not authorized, including through a third party, and (3) products authorized in the United States may or may not be authorized in all global markets; therefore, the combination of these traits and the grain and certain byproducts (including oil) from these products may not be authorized in some markets.

Our Commitment to Excellence Through Stewardship®

www.excellencethroughstewardship.org

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products.

In line with these guidelines, our product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Integrated Pest Management

As a grower, integrated pest management (IPM), provides you the opportunity to tailor how you manage weeds, insects, and diseases in your fields. IPM integrates responsible use of traits, crop protection products, and cultural management practices to:

- Prevent the buildup of pests through starting with a clean field and rotating crops and traits.
- Use seed products, planting technology, and seedling rates that have typically been appropriate for a given crop in a particular geographic area.
- Scout: Monitor for pest populations throughout the growing season to determine if treatment is necessary.
- Intervene when required, using combination of approaches to manage the pest population.
- Use generally appropriate maturity products and harvest schedules, destroying crop residue promptly.
- Minimize over-wintering of pests through soil management practices.
- Use crop rotation, including products with different traits, to help delay onset of resistance.
- Use multiple modes of action in crop protection products to help reduce likelihood of resistance development.

Monitoring Insect Pests

It is important to carefully monitor fields for all pests to determine whether treatment with a pest control method is desired. Scouting techniques and remedial pest control treatments should help address the fact that larvae must hatch and feed before incorporated plant protection technologies have an effect on the pests. Scouting should be performed regularly, particularly after periods of heavy or sustained egg laying (especially during bloom), to determine whether larval survival is potentially significant in a particular field.

Weed Management

Herbicide tolerance technology is intended to offer convenient, effective, and economical weed control in crops. However, intensive long term use of any single herbicide mode of action can lead to the development of weeds resistant to that mode of action. Planting crops that enable use of multiple herbicide modes of actions as part of an IPM program has been shown to provide consistent, effective weed control while reducing the potential for resistance development. Talk to your local sales professional about the herbicide tolerance in your crops.

Herbicide Groups

The Weed Science Society of America categorizes herbicides into different groups based on their mode of action. If a given weed population has plants resistant to a herbicide in one group, that weed population may not be able to be effectively managed using only other herbicides in that group. However, that weed population may be able to be managed with a different herbicide from a different herbicide group, whether alone or in combination with a herbicide from that same group, or by using other weed management practices, such as mechanical practices. Note that herbicide classification may not, in all circumstances, address weeds resistant to particular herbicides. Consult your local sales professional, state cooperative extension service, professional consultants, or other qualified individuals to discuss appropriate actions to address specific weeds that appear to show resistance to a particular herbicide.

Integrated Weed Management (IWM)

There is no “one size fits all” to any weed management program. We recommend inquiring the advice of your local agronomist or technical advisor to develop a local integrated weed management solution that utilizes widely accepted best management practice (BMPs) concepts.

Maintain clean fields by using the following best practices:

1) START CLEAN

- a. Scout fields before and after use of any management tactic
- b. Keep accurate records of your management tactics used and their results, including any indications of changes in response with difficult to control weeds
- c. Control weeds early, generally before exceeding 15 cm in height

2) KEEP CLEAN

- a. Use correct herbicide(s) for the weed spectrum, with proper rates and timing
- b. Rotate modes of action ensuring herbicides used provide effective control of the target weed species present in your field.
- c. Incorporate sound agronomic practices that improve your crop's ability to compete effectively with weeds

3) LEAVE CLEAN

- a. Control weed escapes that can occur before or after harvest
- b. Thoroughly clean equipment to avoid field to field weed spread

Corteva Agriscience supports the Take Action effort. Take Action is an industry-wide partnership between university scientists, major crop protection providers and organizations representing corn, cotton, sorghum, soybean and wheat growers to help them manage pests such as herbicide-resistant weeds. The Take Action effort encourages you to develop a proactive strategy to manage herbicide-resistant weeds that incorporates a diverse set of controls. To find out more about how you can take action, visit www.iwilltakeaction.com, or contact your local extension office.

CORTEVA AGRISCIENCE DOES NOT MAKE ANY REPRESENTATIONS, WARRANTIES OR RECOMMENDATIONS CONCERNING THE USE OF PRODUCTS MANUFACTURED OR MARKETING BY OTHER COMPANIES INCLUDING BUT NOT LIMITED TO THOSE THAT ARE LABELED FOR USE IN CROP(S) CONTAINING CORTEVA TECHNOLOGY. CORTEVA AGRISCIENCE AND ITS AFFILIATED COMPANIES SPECIFICALLY DISCLAIMS ALL RESPONSIBILITY FOR THE USE OF THESE PRODUCTS IN CROPS CONTAINING CORTEVA TECHNOLOGY. ALL QUESTIONS AND COMPLAINTS ARISING FROM THE USE OF PRODUCTS MANUFACTURED OR MARKETING BY OTHER COMPANIES, OR THE IMPACT TO CORTEVA TECHNOLOGY FROM THE USE OF SUCH PRODUCTS, SHOULD BE DIRECTED TO THOSE COMPANIES. IT IS THE GROWER'S OBLIGATION TO READ AND FOLLOW PRODUCT LABEL REQUIREMENTS. CORTEVA AND ITS AFFILIATED COMPANIES ARE NOT RESPONSIBLE FOR ANY MISUSE OR MISAPPLICATION OF PRODUCTS, INCLUDING PESTICIDES, BY A GROWER.

Additional stewardship information may be found at www.corteva.us or consult your local sales professional. You may also contact Corteva Agriscience at: 1-800-258-3033.

Herbicide Resistant Weeds

Weed resistance is a serious problem that all of us need to consider when planning our integrated weed management program. Herbicide resistance is the ability of a weed biotype to survive a herbicide application, where under normal circumstances that herbicide applied at the recommended rate would kill the weed. The Herbicide Resistance Action Committee (HRAC) offers additional assistance in confirming herbicide resistance on their website hracglobal.com. Understanding risk for herbicide resistance is important. Table 1 below will help assess the risk of resistance developing in each field.

Grower awareness and proactive management of herbicide resistant weeds are part of a successful weed control program. Suspected herbicide resistance is defined as the situation where the following three indicators occur at a site or location:

- Failure to control a weed species normally controlled by the herbicide at the dose applied, especially if control is achieved on adjacent weeds.

- A spreading patch of non-controlled plants of a particular weed species; and

- Surviving plants mixed with controlled individuals of the same species.

With confirmed herbicide resistance, other weed management practices should be employed to control and prevent the spread of a population of herbicide resistant weeds. Your Corteva Agriscience sales professional can provide recommendations for a particular herbicide resistant weed. Report any incident of non-performance against a specific weed of the herbicide used to your Corteva sales professional, local retailer, or county extension agent. Corteva Agriscience herbicide product labels include weed resistance management language and approved labels, including supplemental labeling, must be in possession of the user at the time of pesticide application and can be obtained by contacting your state's pesticide lead agency or the website www.cdms.net. Labels can also be found at www.corteva.us.

Table 1. Assessment of the Risk of Resistance Development per Target Species (The major risk factors within a cropping system)

Management Option	Risk of Resistance		
	Low	Moderate	High
Herbicide mix or MOA rotation in cropping system	≥3 MOAs	2 MOAs	1 MOA
Integrated Weed Control	Cultural, Mechanical, & Chemical	Cultural & Chemical	Chemical only
Use of same MOA per season	Once	More than once	Many times
Cropping system	Full Rotation	Limited rotation	No rotation
Resistance status to MOA	Unknown	Limited	Common
Weed infestation	Low	Moderate	High
Control in last 3 years	Good	Declining	Poor

Sunflower Hybrids with the ExpressSun® Trait

Not all products described in this Product Use Guide are available in all brands.

ExpressSun® trait

Why should I grow sunflower hybrids with ExpressSun® tribenuron methyl herbicide tolerant trait?

The technology combines high yield potential sunflower hybrids tailored to your regional conditions with a full package of agronomic traits and tolerance to broad-spectrum herbicides, delivering efficient and effective weed control, crop quality, and global market acceptance.

Sunflower hybrids with the ExpressSun® herbicide tolerant trait are tolerant to tribenuron methyl. The hybrids have been bred using traditional breeding techniques to provide tolerance to specific herbicides.

- The ExpressSun® herbicide tolerant trait system provides improved weed control over non-herbicide tolerant sunflower hybrids with traditional herbicides, and gives farmers the flexibility to spray herbicides after crop emergence.
- The ExpressSun trait only provides tolerance to tribenuron methyl and not other Group 2 herbicides.
- Tribenuron methyl will damage any non-herbicide tolerant sunflower hybrid.

It is imperative that good agricultural practices, the herbicide label instructions, local laws and the guidelines below are followed to preserve the efficacy of the technology and comply with all stewardship recommendations.

Management of Volunteer Sunflowers with Herbicide Tolerant Technology

As with all sunflower crops, good volunteer management is essential to avoid competitive weeds in the following crops and the build-up and spread of major diseases.

Volunteers with the herbicide tolerance traits can be controlled in crops other than sunflowers by tillage and/or any non-Group 2 herbicide currently registered for sunflowers. Please contact your local herbicide retailer / distributor to determine the best herbicide options available.

- Plan at least a year ahead when planting sunflower hybrids with herbicide tolerant technology to include a diverse weed management plan and crop rotation that optimizes volunteer control in the next crop.
- Always employ good field hygiene in and around fields of sunflower hybrids with herbicide tolerant technology. Control volunteers in neighboring areas and avoid field-to-field movement of seed with planting, cultivation, and harvesting equipment.
- Prior to planting sunflower hybrids with herbicide tolerant technology, scout for volunteers and wild sunflowers in neighboring areas. Control these by using tillage, mowing and/or non-Group 2 herbicides alone or in a tank mix, prior to seed set.

Management of herbicide resistance in weeds

The potential for weeds to develop herbicide resistance to herbicides must be considered when planning herbicide use. Herbicide resistance in weeds can develop and spread when a resistant plant reproduces and multiplies with repeated use of the same herbicide mode of action.

- Always grow sunflower hybrids with herbicide tolerant technology in rotation with other non-herbicide tolerant crops. Use at least a 3-year crop rotation, this allows the use of alternate weed control methods, prevents build up of volunteers and also reduces pressure from common sunflower insect pests, diseases and Orobanche. As an additional good practice, avoid planting sunflower hybrids with herbicide tolerant technology in areas with a history of heavy infestations by wild sunflower.
- Do not rely on Group 2 herbicides for weed control across the crop rotation, but alternate modes of action at least 2 out of every 4 years on your fields. Using more than one mode of action herbicide in a mixture is a proven practice to delay the development of resistant weeds. To be effective in preventing the build up of resistance, an herbicide mixture must contain active ingredients which give high levels of control of the target weed and are from different mode of action groups. Please refer to the tribenuron methyl information label for more details.
- Maintain detailed field records so that cropping and herbicide history is known.
- Scout fields after herbicide application to detect weed escapes or shifts. If a potentially resistant weed or weed population has been detected, use available control methods to avoid seed dispersion in the field.
- Clean equipment before moving between fields and after harvest to minimize the dispersion of weed and volunteer sunflower seed.

If you suspect a weed control failure is caused by weed resistance to an herbicide you should first contact your local sales professional.

¹ Group 2 herbicides, i.e., ALS inhibitors, are products based on the following chemical families: imidazolinones, pyrimidines, sulfonamides, sulfonyleureas, triazopyrimidines. For more information on herbicide groups, please follow this link: <http://www.hracglobal.com/pages/classificationofherbicidesiteofaction.aspx>

PRODUCT USE STATEMENT: This seed contains the ExpressSun® trait provides resistance to tribenuron-methyl herbicides labeled for use with the ExpressSun trait. **WARNING:** The ExpressSun trait will safeguard ONLY against applications of tribenuron-methyl herbicides labeled for use with the ExpressSun trait, when applied at labeled rates. The ExpressSun trait **WILL NOT** safeguard against applications of other herbicides which require a different herbicide resistance gene. Always read and follow herbicide label instructions prior to use.

ACCIDENTAL APPLICATIONS OF INCOMPATIBLE HERBICIDES TO THIS HYBRID COULD RESULT IN TOTAL CROP LOSS.

Not all herbicides are registered for sale or use in all states or counties in the United States or all provinces in Canada. Contact your local regulatory agency to determine if a product is registered for sale or use in your area. Always read and follow label directions.

YOU MUST SIGN A TECHNOLOGY AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.

Imidazolinone Sunflower (IMI) Stewardship Guidelines

IMI Tolerant

General Guidelines

1. To avoid severe crop injury, only use imidazolinone-containing sunflower herbicides on IMI sunflower hybrids. Note that IMI seed bags feature the suffix "IMI."
2. Growers are required to apply **Beyond®** herbicide from BASF at label rates on IMI sunflower. Use of other imidazolinone or other group 2 (ALS – acetolactate synthase inhibiting) herbicides may cause severe injury to IMI sunflower.
3. Always follow local good agricultural practices. Use an integrated weed management program that includes herbicides and mechanical (tillage) and cultural practices before seeding IMI sunflower crops.
4. Always comply with all applicable laws and follow herbicide label instructions to achieve best possible weed control.
5. Promote good agronomics by reducing disease and insect pressure in sunflower. Healthy sunflower plants compete better with weeds and tolerate herbicides more than weak sunflower plants.
6. Minimize harvest crop seed losses in the field through close attention to timeliness of harvesting and correct setup of harvest equipment. Cover crop seed loads during harvest and transport to avoid dispersing seed.
7. Follow specific management practices that prevent or delay the development of herbicide resistance in weeds and preserve the usefulness of this technology.

Resistance Management

Rotate crops

1. Avoid continuous cropping of IMI sunflowers on the same acre(s). This practice may reduce the threat of crossing between IMI and wild sunflowers. Always grow IMI sunflowers in rotation with other crops.
 - a. This breaks the cycle of continuous sunflower production and allows the use of alternate mode-of-action (non-IMI) herbicides.
 - b. Crop rotation is recommended to reduce disease and insect pressure in sunflower fields.
2. Don't rotate consecutively with another IMI crop.
3. Properly manage weeds in sunflower-fallow-sunflower rotations. In the fallow year, control weeds before they set seed. Control should be obtained through the use of burndown (non-ALS- inhibiting) herbicides and/or tillage.

Rotate herbicides with the crop rotation

1. To reduce selection pressure, use herbicides with a different mode of action than IMI herbicides, which are AHAS or ALS-inhibitors (WSSA Group 2 or HRAC Group B*).
2. Avoid application of herbicides with the same site of action more than twice a season.
3. Do not use solely ALS herbicides on the same field more than two out of four years.

4. Use sequential or tank mix partners with multiple modes of action to reduce the probability of resistance development among weed species in any given field.

Herbicide Use & Weed Control

1. Do not apply **Beyond®** herbicide to non-IMI sunflowers.
2. Always use a certified adjuvant with **Beyond** herbicide per label directions. On IMI sunflower hybrids, use a non-ionic surfactant (NIS at 0.25% v/v) with at least 80% active load (ex., 80/20) with **Beyond** herbicide.
3. Always apply **Beyond** herbicide with a nitrogen fertilizer, such as liquid or dry spray-grade AMS, 28%N, 32%N or 10-34-00.
4. Clean spray tank thoroughly before spraying **Beyond** to avoid IMI sunflower injury due to residue of herbicides from previous spray. This also helps avoid herbicide drift to IMI sunflower from herbicide spray of adjacent fields.
5. Don't spray **Beyond** if rain event is expected within one hour after the spray.
6. Use preemergence, non-ALS-inhibiting herbicides such as **Prowl H₂O** that provide soil residual control of broadleaf and grass weeds at planting of IMI sunflower to reduce early season weed competition.
7. Scout fields before herbicide application to ensure herbicides and rates will be optimum for the weed species and weed sizes present.
8. Scout the field after **Beyond** application. Rogue seed production fields for IMI sunflower hybrid off-types and survived weed plants.
9. Control weed escapes with herbicides possessing a different site of action or use a mechanical control measure. Weed escapes should not be allowed to reproduce by seed or to proliferate vegetatively.
10. Thoroughly clean equipment used to plant, harvest, transport and condition IMI sunflower to avoid the spread of weed seed.
11. Manage weed seed at harvest and post-harvest to prevent a buildup of the weed-seed bank.

Wild Sunflower Control

Follow stewardship practices to minimize outcross populations, which can occur when the herbicide-tolerant trait in IMI sunflowers moves into a wild sunflower population (resulting offspring may then exhibit resistance to IMI herbicides).

1. Do not cultivate IMI sunflowers on land with a history of heavy infestation of wild (common or prairie) sunflower to reduce the threat of pollination of IMI sunflowers with wild sunflower.
2. Where possible, avoid growing IMI sunflower in fields adjacent to other non-IMI sunflower.
3. Whenever IMI sunflower is planted, always apply an imidazolinone-containing herbicide to control any wild sunflower in the

field and to prevent hybridization of IMI and wild sunflowers and gene outcrossing.

4. Control wild sunflowers in areas adjacent to IMI such as road ditches, field borders or fence rows with mechanical means or by using a herbicide with a non-ALS mode of action. This also aids in reducing vectors of disease and damaging insects harbored by nearby wildflower species.
5. Control emerged wild sunflowers prior to planting IMI sunflowers with a non-ALS- inhibiting burndown herbicide and to eliminate any emerged naturally- occurring biotype that may already be resistant to ALS-inhibiting herbicides.
 - a. This reduces the reliance on ALS herbicides for weed control, thereby reducing the selection pressure for weed resistance.
 - b. It also can eliminate any wild sunflower biotypes that may already be resistant to ALS herbicides.

Volunteer Control

After growing IMI sunflower crops, volunteer IMI sunflowers may appear within the field and neighboring fields. It may be the result of normal agricultural practices or from pollination within neighboring sunflower crops. Cross-pollination from volunteer plants is problematic because it increases the risks of herbicide tolerance spreading. Volunteer plants also act as competitive weeds in following crops and may lead to the build-up and spread of major diseases. To control volunteers, employ good field hygiene and proper use of herbicides.

1. Control weeds in the sunflower crop.
2. Avoid field-to-field mechanical movement of seed within seeding or harvesting equipment.
3. Stimulate germination of volunteer sunflower plants post-harvest so that such plants can be controlled with herbicides or mechanical tillage.
4. Use appropriate non-Group 2 herbicides.

* Group 2 herbicides, i.e. ALS inhibitors, are products based on the imidazolinone chemical family.

Visit <http://www.hracglobal.com/pages/classificationofherbicidesiteofaction.aspx> for more information on herbicide groups.

Coexistence

For decades, multiple agricultural systems have successfully coexisted in the United States and around the world, from initial production through supply chains to the ultimate end users. Over time, management practices to facilitate these different agricultural systems have developed and have been continuously improved so that high purity and high quality seed and grain is available to help growers, handlers, and end-users maximize opportunities and take full advantage of the wide variety of technologies available to each. One example of successful coexistence is the production of similar commodities in close proximity, such as field corn, sweet corn, white corn, and popcorn. Coexistence strategies should be designed to meet market requirements using science-based industry standards and management practices, and should be flexible to facilitate diverse options and choice for growers and the food and feed supply chain. This flexibility also should include the ability of coexistence strategies to be modified as changes in products, markets, or practices take place. The on-going success of coexistence has depended upon cooperation, communication, flexibility, and mutual respect for each cropping system among the entire value chain. Over the years, growers have adapted to changes and innovation in agriculture by using new farm management practices, new technologies, and other appropriate practices and can continue to do so into the future.

It is therefore incumbent on all growers to consider and implement management practices to satisfy the relevant marketing and stewardship practices required by the desired end market. By choosing to grow any crop, growers are inherently agreeing to use practices appropriate to ensure the integrity and marketability of those crops for the intended market and that suitable management and stewardship practices are being implemented, considering each neighbors' farm management. This is true regardless of the particular market being served, whether it is specialty crops, identity-preserved crops, organically-produced crops, conventionally produced crops or crops with biotech traits.

For products receiving premiums, the grower is producing a crop supported by a special market price, and therefore assumes responsibility for meeting any applicable market specifications to receive the applicable premium price from that market. Likewise, for products containing biotech traits that may not yet be approved in certain export markets or have special considerations related to production practices (e.g., herbicide application, specialty characteristics), the

grower assumes responsibility for the stewardship conditions and implementation related to use of such technologies. Even though the ultimate responsibility is on the grower producing a crop for a particular market to implement appropriate stewardship practices and requirements, including those communicated by a seed provider, it is also each grower's responsibility to communicate with and be aware of the planting intentions of his or her neighbors to gauge the need for any appropriate management and coexistence practices. By communicating what is being grown on neighboring fields and the potential implications of those crops on each growers' management decisions, growers can utilize some of the following coexistence considerations to limit potential conflicts, while acknowledging the generally recognized and accepted occurrence of the movement of incidental amounts of pollen:

- What is the crop biology and what are the product characteristics, specifically considering whether or not the crop is self-pollinating or cross-pollinating;
- What options exist to arrange or select planting locations and fields to help minimize the potential for outcrossing to or from a particular crop, by considering, for example, appropriateness of buffer rows, environmental windbreaks, or land devoted to conservation;
- What options exist related to staggering planting times to help temporally isolate a given crop from the potential of unintended outcrossing;
- What are cleaning and handling options for a particular crop that could help to minimize the potential for inadvertent commingling during planting, harvesting or cleaning activities, considering the use of planters, combines, seed storage bins, seed hopper/boxes, transportation vehicles, and other equipment pre- and post-harvest; and
- Understanding characteristics of applied technologies or pest management tools and the potential impact to different types of crops planted in the vicinity.

In today's agricultural marketplace, growers share common goals of increasing productivity and profitability, and through planning and proactive management measures, coexistence can help all growers meet their productivity goals and stewardship responsibilities while respecting their neighboring farming operations.

Seed Treatment Stewardship

Seed treatments, including fungicides, insecticides, nematicides, and amendments, play a critical role in agriculture and the production of a healthy crop. In addition to helping manage against early season pests and diseases, they serve as a viable alternative to foliar and soil applications.

Seed treatment management and responsible stewardship play a vital role in sustaining our environment while maximizing crop health. Responsible stewardship practices help maintain seed and seed treatment integrity, which keeps the active ingredient on the seed to achieve the maximum crop health benefit for the investment. In addition, these practices help minimize the potential for adverse effects on producers and the environment, including pollinators, which may be present at the time of planting.

Additional best management practices can be found:
<http://seed-treatment-guide.com/>

For a short video on treated seed stewardship, click here or type into your web browser the following:

<http://honeybeehealthcoalition.org>

STEPS FOR STEWARDSHIP OF TREATED SEED

Follow Directions

Follow directions on treated seed container labeling for handling, storage, planting and disposal practices.

Eliminate Weeds

Eliminate flowering plants and weeds in and around the field prior to planting.

Clean and Remove

Completely remove all treated seed left in containers and equipment used to handle harvested grain and dispose of it properly. Keep all treated seed out of the commodity grain channels.

Minimize Dust

Use advanced seed flow lubricants that minimize dust.

BeeAware

At planting, be aware of honey bees and hives located near the field, and communicate with beekeepers when possible.

For detailed information about stewardship of treated seed, check out seed-treatment-guide.com

Intellectual Property Protection

Innovation is critical to the future of farming, and agricultural innovations take decades of research and testing and hundreds of millions of dollars of investment to bring to market. That's why Corteva invests nearly \$4 million every day on research and development. However, misappropriation of seed products—such as brown bagging or bin-run seed, and/or non-compliant crop protection product use—puts grower access to innovation at risk.

It is important to note that Corteva Agriscience product offerings, even if not biotech, can carry multiple types of intellectual property protection, such as patented genetics, patented breeding technologies, plant variety protection, patented transgenic traits, and patented native traits, including through the terms and conditions of use found in the Corteva Agriscience Technology Use Agreement (TUA).

Corteva is committed to protecting the intellectual property of traits, varieties, and hybrids we produce, sell and license to ultimately benefit our customers, sales teams, licensees, and business partners and want to remind you of some tools designed to protect innovations, such as Enlist E3® soybeans.

1. **Technology Use Agreements:** Growers are required to sign the TUA prior to obtaining Corteva seed products and traits. The TUA outlines the grower's responsibilities and obligations regarding Corteva-provided intellectual property and following and adhering to the Corteva Product Use Guides so that growers implement proper product stewardship.
2. **Tip Line:** Growers and others can anonymously report unauthorized use of non-Enlist 2,4-D products with Enlist crops—as well as misuse of seed technology like bin-run/saved seed—by contacting an industry tip line established by the Seed Innovations and Protection Alliance (SIPA) at (844) 733-3847 or by visiting SeedipAlliance.com.

Why is a TUA required?

- The TUA serves as an agreement between the customer and Corteva demonstrating that the customer understands and agrees to follow all stewardship and legal responsibilities related to their purchase. The TUA protects two major components: (1) technology use (e.g. Enlist® weed control system, Bt Corn, etc.) and (2) intellectual property rights (e.g. germplasm, traits, patents and other proprietary know-how). Corteva makes substantial investments to bring new traits, technology, germplasm, and products to the market. It is important to protect these investments so Corteva can continue to fund research and business development initiatives.
- The Corteva TUA grants customers access to all current and future product offerings without the need to sign additional TUAs. The **Update Notification** is a required mechanism to inform customers on changes to the TUA along with important product usage information in which customer compliance is required. The Update Notifications will be delivered annually and will be distributed electronically, via postal mail and will also be made available on <http://www.traitstewardship.com/>.
- In addition to the Corteva TUA, there is a Corteva TUA+Addendum that is required to be signed annually by customers that purchase Enlist®-containing corn products in a specific geography where Enlist herbicides are not registered for use. The TUA Addendum can be found at: <http://www.traitstewardship.com/>.
- The TUA grants a limited license for the grower to use/plant Corteva Agriscience seed containing Corteva Agriscience sourced technologies (including germplasm, non-biotech traits, and biotech traits) and produce a single commercial grain crop.
- The TUA requires growers to use and follow the applicable product use guide and labels (seed and herbicide). The TUA prohibits certain activities such as saving seed or use of unauthorized herbicides, including on Enlist® or glyphosate tolerant crops (where applicable).

Seed Innovations and
Protection Alliance (SIPA)
SeedipAlliance.com

Corteva Agriscience TECHNOLOGY USE AGREEMENT

2026 Growing Season / Document valid through December 2026

This Technology Use Agreement ("TUA") is entered into by Grower and Corteva Agriscience to set forth the terms and conditions upon which Grower shall use Seed containing Corteva Sourced Technology (including, but not limited to, germplasm and conventional seed products, and products such as Optimum[®] GLY herbicide tolerance, Enlist E3[®] soybeans, Qrome[®] corn, Vorced[®] Enlist[®] corn, etc.). All capitalized terms in this TUA shall have the meanings given to them in Article 1 below or as otherwise defined in the Agreement.

By signing below, the undersigned represents and agrees that: (1) he/she is eighteen (18) years of age or older; (2) he/she has read all pages of this TUA and understands the terms and conditions of the Agreement, including, without limitation, the terms and conditions set forth in the documents linked to this TUA via the hyperlinks provided below; (3) he/she is fully authorized to legally bind and to enter into the Agreement on behalf of the Grower identified in the Grower Information box below; and (4) the terms and conditions of the Agreement are legally binding on the Grower and all individuals and entities that will plant and grow crops from Seed on behalf of the undersigned and the Grower.

Opt In: Please check box to receive electronic marketing communications from Corteva Agriscience.

Yes, I would like to receive agronomy advice, special offers, product information, news and updates through electronic communications from Corteva. By checking this box, I agree to receive automated marketing texts from Corteva at the phone number provided above. I understand consent is not a condition of purchase.

"Personal Information" means any information that identifies, is related to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular individual or where applicable, relates to an identifiable juristic person or legal entity.

"Pioneer" means Pioneer Hi-Bred International, Inc.

"Production Crop" means a crop the Grower produces for Corteva or a Corteva Licensee, utilizing Seed, pursuant to a valid Seed Production Agreement or similar agreement, which is controlled by Corteva or a Corteva Licensee.

"Purchased Seed" means Seed that is purchased by Grower from a Seed Seller under a fully executed TUA to which Grower and Corteva are parties, as amended pursuant to Update Notification(s), or otherwise.

"Representatives" means Corteva or Corteva Licensee representatives, agents, contractors and designees of any owner of Corteva Sourced Technology.

"Seed" means agricultural planting seed for all crops containing Corteva Sourced Technology, Enlist herbicides and/or intellectual property sold by Seed Sellers. Seed may contain Third-Party Trait Technology that is subject to such third-party's separate licensing arrangements.

"Seed Seller" means Corteva and those individual and entities authorized by Corteva to sell Seed.

"Seed Stock" means Seed that is owned by Corteva or a Corteva Licensee that is made available to a Grower to produce a single Production Crop.

"TUA Addendum" means an additional agreement entered into between the Grower and Corteva that defines use restrictions associated with Enlist-containing products in states and counties in the United States in which Enlist One[®] and Enlist Duo[®] herbicides are not registered for use.

"Third-Party Trait Technology" means proprietary trait technology from a technology provider other than Corteva.

"Update Notification" means a communication made to growers from time to time by Corteva with updated or new terms of the Agreement, which may include, without limitation, information regarding new and existing Corteva Sourced Technology, the patents licensed under the Agreement and any new or modified Agreement terms. Update Notifications will be distributed routinely and at Corteva's discretion.

2. LIMITED LICENSE:

2.1 Upon acceptance by Corteva of this TUA and for the term of the TUA, unaltered and duly executed by Grower, Grower is granted and hereby accepts, subject to the terms and conditions of the Agreement, a limited, non-transferable, revocable, non-exclusive, and non-sublicensable license by Corteva under the Licensed Rights solely to (i) purchase Seed from a Seed Seller or Corteva Licensee; and/or (ii) to plant Purchased Seed to produce a single commercial crop in the United States in a single growing season.

2.2 If Grower has entered into a current and valid seed production Agreement or similar agreement (collectively, referred to as "Seed Production Agreement") with Corteva or a Corteva Licensee, Grower is granted and hereby accepts, subject to the terms and conditions of the Agreement, a limited, non-transferable, revocable, non-exclusive, non-transferable, non-sublicensable license to plant Seed Stock to produce a single Production Crop in the United States provided that all such Production Crop is delivered to, or its disposition is controlled by, Corteva or the Corteva Licensee.

2.3 In addition to the foregoing, when Grower purchases or receives Seed or Seed Stock and/or plants Purchased Seed or Seed or Seed Stock containing Enlist[®] technology, Grower receives a limited license to use Enlist herbicides in conjunction with Enlist[®] crops grown from such Purchased Seed or Seed Stock. This limited, non-transferable, revocable, non-exclusive, and non-sublicensable license that applies solely to Grower's activities in the United States and does not authorize Grower to plant Seed in the United States that has been purchased in or acquired from another country or to plant Seed in another country that has been purchased/acquired in the United States.

2.4 Corteva is a member of SIPA, and reports made on the SIPA tip line or via the website regarding Corteva products will be directed to our Commercial Compliance Team. If you suspect illegal use of Corteva technology, traits, germplasm or herbicides, reports can be made anonymously using the Industry Tip Line (1-844-SEED-TIP) or website (www.seedipalliance.com) which are hosted by an independent organization, the Seed Innovations Protection Alliance (SIPA).

2. Mail: AgCelerate
PO Box 221679
Charlotte, NC 28222-1679

1. DEFINITIONS: Each of the following terms shall have the meaning specified below:

"Agreement" means, as of any date of determination, (i) this TUA; (ii) the then-current Guide(s); (iii) the then-current Update Notification(s); (iv) the then-current TUA Addendum(s); and (v) the terms of the Delivery Ticket, all of which are incorporated herein and deemed a material part of the Agreement.

"Claim(s)" means any completed, actual, pending or threatened claim, action, suit, demand, or proceeding, whether in law or equity and whether civil, criminal, administrative or investigative (including any action by governmental authorities).

"Colex-D[®] Technology" means a Corteva-proprietary herbicide technology package comprised of 2,4-D choline, advanced formulation science and innovative manufacturing processes, which is specifically designed to provide ultra-low volatility, minimized potential for physical drift, decreased odor and improved handling characteristics.

"Corteva" and "Corteva Agriscience" means, collectively, Corteva Agriscience LLC, Pioneer Hi-Bred International, Inc., Corteva Agriscience MCS LLC, and their parents, affiliates and subsidiaries.

"Corteva Sourced Technology" means proprietary germplasm and all current and future seed trait technology as set forth in applicable Update Notification(s). Corteva Sourced Technology currently covered as Licensed Rights by this TUA includes, but is not limited to, the patents listed in Update Notification(s) provided at the time of execution of this TUA or thereafter.

"Delivery Ticket" means the document signed by Grower upon each delivery of Purchased Seed.

"Enlist[®] herbicides" means agricultural products that contain 2,4-D choline herbicide featuring Colex-D Technology.

"Grain" means material utilized for food, feed, and/or fuel and not planted/propagated in the future.

"Grower" means all individuals and/or entities associated with the farming operation identified in the applicable Grower Information box above.

"Guide" mean the Product Use Guide document(s) published and updated by Corteva from time to time that specify, among other things, stewardship management practices for Seed, Enlist herbicides and Corteva Sourced Technology.

"Licensed Rights" means all patent claims (registered and unregistered), trade secrets, rights existing under the US Plant Variety Protection Act (or its foreign equivalents) and other intellectual property rights relating to Corteva Sourced Technology or Enlist herbicide that are reasonably necessary for a Grower's exercise of the limited license granted under Article 2 below with respect to Purchased Seed or Seed Stock. The Licensed Rights as of any date of determination are set forth in the current Update Notification.

"Licensee" means an entity that has a valid, active agreement with Corteva granting such entity a license to produce and sell Corteva seed trait technology in its seed products.

"Loss(es)" means all damages, losses, awards, judgments, settlements, assessments, liabilities, taxes, levies, penalties, fines, charges, costs and expenses (including any court costs and reasonable legal and professional fees and expenses, including in investigating and preparing for litigation or proceeding) and any other payments.

"Patents" means Corteva patents, registered and unregistered, held in the United States and/or Canada.

For further information or to view the current Technology Use Agreement, Update Notification or a Product Use Guide, go to www.traitstewardship.com or contact Corteva Agriscience at 1-800-258-3033.

PROHIBITED ACTIVITIES:

With respect to Corteva Sourced Technology, Grower acknowledges and agrees that Grower is NOT permitted to do any of the following and should Grower, or someone on Grower's behalf, perform any of the activities listed below, shall result in Grower being in breach of this TUA:

- supply, sell, transfer, license, sublicense or otherwise distribute any Seed, Seed Stock, or Corteva Sourced Technology to any other person, entity or other third-party for planting or any other purposes;
- accept any Seed or Seed Stock from any third-party other than a Seed Seller, Corteva, or a Corteva Licensee;
- save, clean or use any crop produced from Seed for planting and/or supply crop produced from Seed to anyone for planting. The planting of any crop produced from Seed is not licensed and shall constitute infringement of Corteva's Patents, unless specifically permitted by a written agreement with Corteva or a Corteva Licensee;
- plant Seed for seed production unless, and only if, Grower has entered into a valid, written Seed Production Agreement or similar agreement with Corteva or a Corteva Licensee, which requires Grower to physically deliver the resulting crop either to Corteva or the Corteva Licensee;
- sell for non-seed purposes or use for non-seed purposes all of the Seed produced;
- purchase or otherwise obtain from Corteva or the Corteva Licensee any of the Seed produced unless, after physical delivery by Grower to Corteva or the Corteva Licensee, the Seed has been conditioned, packaged and delivered by Corteva or the Corteva Licensee to Grower in the same manner as Seed sold by Corteva or the Corteva Licensee to growers who have not entered into a Seed Production Agreement; and/or
- use or allow others to use Seed, plant any Seed or use any crop or plant material produced from Seed, for crop breeding, research, or generation of herbicide or other regulatory registration data. Grower may not conduct research on Grower's crop produced from Seed.

In addition to the above Prohibited Activities, and with respect to Enlist® crops and herbicide use on those crops, Grower acknowledges and agrees:

- the Grower is NOT permitted to use any product or herbicide herbicides (e.g., trioxyp, glyphosate, or Enlist®) on Enlist® corn or soybean crops, or on any other crops, unless the product is expressly labeled for use on Enlist® soybean or Enlist® cotton;
- following burn-down (including pre-emergence use), Grower is NOT permitted to use any phenoxy-carboxylate herbicide-containing product (e.g., containing 2,4-D, 2,4-DB, MCPA, dichlorprop, LV6, MCPB, mecoprop), which is NOT expressly labeled for use in conjunction with Enlist crops and does not contain 2,4-D choline with Coles-D technology;
- following burn-down, Grower is NOT permitted to use any aryloxyphenoxy-propionates (AOPP) herbicides (e.g., quizalofop, cyhalofop, diclofop, fluroxypyr, fluzifop) on emerged Enlist® corn, unless the product is expressly labeled for use in conjunction with Enlist corn; and/or
- the Grower agrees to follow and adhere to the TUA Addendum.

Should Grower, or someone on Grower's behalf, perform any of the activities listed above, they shall be in breach of this TUA.

Grower further acknowledges and agrees that the limited license(s) granted herein do not convey or otherwise transfer any ownership rights of Corteva Sourced Technology or Enlist® herbicides to Grower.

3. UPDATES AND DOCUMENTS THAT ARE PART OF THIS AGREEMENT:

3.1 Each Update Notification is hereby incorporated into this TUA and deemed a material part of the Agreement once posted on www.traitstewardship.com. For so long as Grower has a valid TUA in effect with Corteva, Corteva will provide notice of Update Notifications to Grower using SMS Text, the email address and/or physical address provided by Grower in the Grower Information box above. Grower acknowledges and agrees that they are required to update their contact information regularly to receive Update Notifications. Grower may opt-out of receiving Update Notifications by SMS text and thereafter shall receive Update Notification by email or mail to their physical address.

3.2 Current Guides are available from Seed Sellers, from Corteva directly and on www.traitstewardship.com.

3.3 Until this TUA is terminated or superseded as set out in Article 5, the terms and conditions of use set forth on the packaging, container or label (including bag/tags) (collectively, "Label Terms") of Purchased Seed and terms and conditions of the Delivery Ticket are hereby incorporated herein and deemed a material part of the Agreement.

3.4 Grower acknowledges and agrees that updates of the Agreement, any Update Notification and any Guide published from time to time by Corteva are incorporated herein and deemed a material part of the Agreement once posted on www.traitstewardship.com.

3.5 Grower's use of Seed after Corteva posts an update on www.traitstewardship.com which updates this TUA, the Agreement, an Update Notification or a Guide, or a new Update Notification or a new Guide, constitutes Grower's acceptance of and agreement to be bound by the provisions of such updated or new documents.

3.6 Inconsistencies among: (i) the Update Notification, (ii) the TUA; (iii) relevant Guide(s), each as posted on www.traitstewardship.com at the time Grower opens a bag or container of Seed for planting; and (iv) Label Terms, shall be resolved in the following order, first, in favor of the Update Notification, second, the TUA, third, the Guide(s) and fourth the Label Terms.

4. STEWARDSHIP AND COMPLIANCE:

4.1 Grower agrees to read and follow all applicable laws and regulations, all applicable Guides, the terms of the Delivery Ticket, and the Label Terms associated with Corteva Sourced Technology and Enlist herbicides. Grower agrees to follow the best management practices, recommendations and guidelines provided in all applicable Guides.

4.2 Grower agrees to read and follow all Insect Resistance Management ("IRM") requirements set forth in the Guide, including any requirements to establish and maintain a refuge. Failure to follow IRM requirements may result in loss of access to insect protected hybrids for at least one year.

4.3 Grower acknowledges that modification, revocation or cancellation of regulatory authorizations and/or registrations including, but not limited to, biotech or other trait(s), enabling technologies and/or enabled pesticide, herbicide or fungicide product(s) by local, state, federal, or foreign regulatory agencies may occur and are outside the control of Corteva. Grower agrees to always read and follow directions for use on pesticide, insecticide, fungicide or herbicide labeling as set forth in the Guide. Grower acknowledges and agrees to Grower's obligation to follow and adhere to any such modifications, revocations or cancellations. Grower further understands that regulatory status and available supplies of a biotech trait(s) and/or pesticide product may limit its availability for use in a particular growing season and/or the marketability of the resulting Grain crop.

4.4 Grower agrees to follow Herbicide Resistance Management ("HRM") practices, such as pre-and post-application field scouting and reporting. Lack of herbicide efficacy must immediately be reported to Corteva.

4.5 Grower agrees to provide Grower's reasonable cooperation to Corteva and the Representatives in connection with their efforts to verify Grower's compliance with stewardship, IRM, HRM and other requirements of the Agreement, including, but not limited to, completing written and oral questionnaires and cooperating with Corteva and third-party on-farm IRM compliance assessments.

4.6 Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotechstatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

4.7 Grower will provide information, as reasonably requested by Corteva, Seed Sellers or Representatives, including, without limitation, USDA Farm Service Agency crop reporting information, Form 578 and corresponding aerial photographs, for the sole purpose to verify compliance with the Agreement (including, without limitation, the license grant, stewardship, IRM, HRM and other requirements).

4.8 In addition, upon request by Corteva, Seed Sellers or Representatives, Grower shall furnish copies of invoices and other relevant documents related to Grower's purchases of Seed and chemical transactions and Grower also agrees to disclose to Corteva, Seed Sellers and/or Representatives certain information, including the locations of all fields, to conform compliance with the Agreement following Corteva's actual (or attempted) oral communication with Grower and not later than seven (7) days after the date of a written request from Corteva, including the locations of all fields planted with crops containing Corteva Sourced Technology or where Enlist herbicide as applied, the identities of all herbicides applied to these fields and other data as specified in the Guide(s).

4.9 As Grower is claiming a tax exemption for the Purchased Seed, Grower hereby represents and warrants that: (i) Grower is in the business of agricultural production; (ii) the Purchased Seed will be used solely for agricultural production; and, (iii) due to the foregoing, Grower qualifies for a tax exemption, under applicable state tax laws, for the Purchased Seed. Grower agrees to provide tax exemption certificates as reasonably requested by Corteva or Seed Sellers.

5. PRIVACY

5.1 Grower hereby consents to the collection, use and disclosure of Grower's Personal Information by and between: (i) Corteva; (ii) retailers, including but not limited to Seed Sellers, from which Grower purchases Corteva products; (iii) Corteva partners and service providers for the purpose of administering Corteva offers, including validation of product purchases and calculation/issuance of rebates and rewards, marketing, surveys, direct mail, digital and social media communication and to improve and modify our products and to personalize services; and (iv) Corteva partners and service providers for purposes of conducting on-farm IRM or other compliance assessments. Corteva warrants the Grower to be familiar with how Corteva collects, uses and discloses information. Any information collected from this TUA, the Agreement, through the provision of services or products, or through Corteva websites or mobile applications generally will be handled in accordance with the Corteva Privacy Statement accessible at <https://www.corteva.com/privacy.html>; and for United States residents in accordance with the United States Privacy Notice, accessible at <https://www.corteva.com/us-privacy-rights.html>. In addition, the California Notice at Collection is accessible at <https://www.corteva.com/us-privacy-rights.html#NoticeCollection>. Different Corteva websites and mobile applications have different purposes, uses and features, consequently, a specific privacy disclosure or statement may apply and each such privacy disclosure or statement supplements and amends the Corteva Privacy Statement.

5.2 Upon Grower request, Corteva or its agents may provide unmanned aerial system ("UAS") or drone flight services to Grower, including those related to aerial imaging (such as hyperspectral, multi-spectral, thermal, and ground-penetrating radar image data) or other services. For any and all such flights: (i) Grower agrees to Corteva conducting such operations over Grower's property or other areas as designated by the Grower and represents that Grower has the authority to grant such permission to Corteva and (ii) upon Grower request, Corteva will provide information regarding the images and data collected during the UAS or drone operations with the Grower.

6. TERM AND TERMINATION

6.1 Excluding those provisions that by their nature need to survive termination of this TUA in order to effectuate their purpose, this TUA, once signed by Grower and accepted by Corteva, will remain in effect until terminated or superseded. Grower or Corteva may terminate this TUA at any time and for any reason by at least thirty (30) days (or one hundred eighty (180) days in Minnesota or ninety (90) days in Wisconsin) written notice of termination to the other party at the address specified in section A, B or D above.

6.2 In addition to the foregoing, Corteva reserves the right to revoke Grower's right to use any Corteva Sourced Technologies and Enlist herbicides upon at least thirty (30) days (or one hundred eighty (180) days in Minnesota or ninety (90) days in Wisconsin) written notice to the Grower. All license grants granted pursuant to this TUA shall automatically terminate upon the termination of this TUA, without the need for further notice or action. In the case of termination by Grower, such notice of termination must include Grower's full legal name, address and license number. Upon termination of this TUA or a license granted hereunder with respect to any Corteva Sourced Technology and Enlist herbicides for any reason, (i) Grower shall terminate the use of all Seeds containing the particular Corteva Sourced Technology or Enlist herbicides, which may require destruction; (ii) Grower shall return unused Seeds containing such Corteva Sourced Technology to Corteva at Grower's cost; and (iii) Grower will no longer have a right to purchase or use Seed containing such Corteva Sourced Technology or Enlist herbicide. Notwithstanding the foregoing, Grower's obligations and Corteva's rights that arose under this Agreement prior to termination will continue in effect.

7. CORTEVA SOURCED TECHNOLOGY FEES:

7.1 Grower agrees to pay a designated Corteva entity or Corteva Licensee all applicable fees that are a part of, associated with or collected with the purchase and use of any Seed and/or Corteva Sourced Technology or Enlist herbicide upon Corteva's payment terms then in effect. Corteva reserves the right to change from time to time the amount and how it charges Corteva Sourced Technology or Enlist herbicide fees. Grower shall pay interest to Corteva on any past-due fees at the rate of 1.5% per month (18% per annum) or the maximum amount permitted by law, whichever is less, from the applicable due date for such fees until paid. Any payments received by Corteva may be applied to unpaid fees, interest or other charges in Corteva's discretion.

8. PRODUCT DESCRIPTION EXPRESS WARRANTY:

8.1 Corteva warrants that the Purchased Seed conforms to the written description(s) on the label, package, bag, tag or container within tolerances, if any, established by law, when used in accordance with the applicable directions and in compliance with the Agreement.

9. DISCLAIMER OF WARRANTY:

9.1 TO THE EXTENT ALLOWABLE BY LAW, THE EXPRESS WARRANTY ABOVE EXCLUDES, AND IS IN LIEU OF, ALL OTHER WARRANTIES, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING ANY WARRANTY OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE HEREBY EXPRESSLY DISCLAIMED. All applicable warranties are contingent upon the proper use in the application for which the Seed was intended and does not cover Seed which has been modified in any manner (including, but not limited to, insecticide or fungicide seed treatment, in-furrow fertilizers, biologicals or micronutrient products of any kind not provided directly by or otherwise approved by Corteva) or which have been subjected to improper storage, abuse, misuse, alteration or neglect. CORTEVA DOES NOT MAKE ANY REPRESENTATIONS, WARRANTIES OR RECOMMENDATIONS CONCERNING ANY SEED OR PRODUCT NOT COVERED BY THIS TUA ("THIRD-PARTY PRODUCT"), INCLUDING, BUT NOT LIMITED TO, THIRD-PARTY PRODUCT THAT IS LABELED FOR USE ON PIONEER BRAND SEED OR OTHER CORTEVA AGRISCIENCE PRODUCTS. CORTEVA SPECIFICALLY DISCLAIMS ALL RESPONSIBILITY FOR THE USE OF THIRD-PARTY PRODUCT WITH PIONEER BRAND SEED OR OTHER CORTEVA AGRISCIENCE PRODUCTS. ALL QUESTIONS AND COMPLAINTS ARISING FROM THE USE OF THIRD-PARTY PRODUCT SHOULD BE DIRECTED TO THE COMPANIES PROVIDING OR PRODUCING SUCH THIRD-PARTY PRODUCT. ANY REPRESENTATION OR WARRANTY RELATED TO ANY CORTEVA PESTICIDE PRODUCT IS LIMITED SOLELY TO ANY REPRESENTATIONS OR WARRANTIES MADE AS PART OF THE SALE OF SUCH CORTEVA PESTICIDE PRODUCT.

10. LIMITATION OF LIABILITY AND PROMPT NOTICE OF CLAIM:

10.1 GROWER'S EXCLUSIVE REMEDY FOR ANY CLAIM OR LOSS (INCLUDING, WITHOUT LIMITATION, CLAIMS ALLEGING BREACH OF WARRANTY, CONTRACT, TORT, STRICT LIABILITY, INFRINGEMENT OR NEGLIGENCE), SHALL BE LIMITED SOLELY AND EXCLUSIVELY TO (i) REPAYMENT OF THE AMOUNT OF THE PURCHASE PRICE OF THE APPLICABLE SEED, OR (ii) REPLACEMENT OF THE AFFECTED SEED, AT THE ELECTION OF CORTEVA AND ITS APPLICABLE SEED SELLER. CORTEVA SHALL BEAR NO LIABILITY FOR LOSS OF OR DAMAGE TO SEED AFTER SEED HAS BEEN DELIVERED TO THE PARTY PURCHASING THE SEED. For clarity, Corteva shall not indemnify Grower for Grower's (or any other person's) not acting on behalf of Corteva) negligence, violation of the Agreement, violation of any law or regulation or any other Losses or any other outcomes resulting from Grower's or Grower's employees, contractor's, or agent's decisions, actions or failure to act.

10.2 IN NO EVENT SHALL CORTEVA, ITS SEED SELLERS OR LICENSEES BE LIABLE FOR ANY INDIRECT, INCIDENTAL SPECIAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH THE SEED OR OTHER CORTEVA PRODUCT, CORTEVA DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED AND MAKES NO STATEMENT WITH RESPECT TO THE ONGOING OR FUTURE REGULATORY STATUS, ACCEPTABILITY, SUPPLY OR AVAILABILITY OF A BIOTECH TRAIT OR TRAIT STACK, INSECTICIDE, FUNGICIDE OR HERBICIDE PRODUCT COMPATIBLE WITH THE SEED, OR, IN EACH CASE, CONTAINED IN THE SEED. THESE TERMS ARE INDEPENDENT OF THE REGULATORY STATUS OF ANY TECHNOLOGY CONTAINED IN, OR SEED FOR USE WITH, THE SEED, INCLUDING PESTICIDE PRODUCTS.

10.3 Because Corteva must have sufficient time to investigate any Claim regarding the performance or non-performance the Seed, no Claim can be asserted against Corteva unless Grower gives notice to Corteva within fifteen (15) days after Grower first observes or has knowledge of indications that the performance of the Seed may be subject to a valid warranty Claim, is not warranted.

11. RIGHT OF ENTRY:

11.1 For the term of this TUA and for one year following its termination, Grower hereby grants Corteva, the Representatives and their respective employees, contractors, subcontractors, agents and designees (collectively, "Personnel"), the complete and unencumbered right, at all times, to (i) observe and/or take video and/or pictures of the crop or Seed, farming activities, spray or other applications, and harvesting activities; and/or (ii) enter upon and have reasonable ingress to and egress from, through, over, under, across and across the property where Grower has planted or is storing or growing Seed as well as having similar access to any refuge area and bins, wagons, tractor trailers or seed storage containers for purposes of data collection, field and crop inspection, testing and examining the land and Grower's crop and taking samples of soil, crops, crop residue or seeds located thereon. Such collection, inspection, examination, testing or sampling shall be performed by Personnel only after Corteva or the Representatives deliver or mail to Grower written notification of the Personnel's visit at least three (3) days in advance and Corteva or the Representative also have reasonably attempted to discuss the visits with Grower in advance of such visits. Grower agrees that such ingress and egress may be made by means of roadways and driveways, to be used in addition with others having right of passage thereon. If Grower is not the owner of premises where such access is needed, Grower shall be solely responsible for obtaining consent from the applicable landowner for the visit.

11.2 To the extent of Personnel's negligent acts or omissions arising out of or in connection with this Article 11, Corteva indemnification of Grower shall be limited to Losses to the applicable Seed crop fields, commercial crop fields or personal property.

12. ADDITIONAL PROVISIONS:

12.1 Grower agrees to communicate all applicable terms, conditions and restrictions on Seed whether under this Agreement, a Guide, an Update Notification or otherwise to all persons and entities possessing or taking an interest in Grower's Seed and Grain therefrom.

12.2 Except as provided herein, notices to Grower or to Corteva shall be sent to the addresses specified in sections A, B or D above.

12.3 Grower agrees that should any information provided to Corteva herein change, Grower will promptly notify Corteva via section D above.

12.4 Nothing in the Agreement shall be construed as a grant or license from Corteva to the Grower for the use of any Corteva trademark. Grower is required to enter a separate trademark license from Corteva to use any Corteva trademarks(s) including, but not limited to, those marks associated with trait, seed, technology or products.

12.5 Grower's rights under the Agreement may not be transferred or assigned to any other person, entity or third-party without the prior written consent of Corteva.

12.6 The Agreement (including documents and updates incorporated herein pursuant to Article 3 hereof) constitutes the entire agreement between Grower and Corteva regarding the use of Purchased Seed, Enlist herbicide and Corteva Sourced Technology. All prior agreements and understandings between Grower and Corteva with respect to Purchased Seed, Enlist herbicide and Corteva Sourced Technology are hereby superseded.

12.7 If any provision in the Agreement is determined to be void or unenforceable, the remaining provisions shall remain in full force and effect.

12.8 The failure of Corteva or any Third-Party Technology providers to exercise one or more of its rights under the Agreement on one or more occasions shall not be deemed a waiver to exercise such right(s) on one or more subsequent occasions.

12.9 This TUA may be executed and delivered by electronic signature (including portable document format) by Grower and Corteva may rely on the receipt of such document so executed and delivered electronically as if the original had been received.

12.10 Any action against Corteva and its Seed Sellers for breach of the terms of the Agreement, including any warranties arising from it, must be commenced within one year after the cause of action accrues or be barred after such time. Where applicable, all required prerequisites to maintaining a legal action may be complied with prior to initiating the legal action.

12.11 No class actions: Any dispute arising out of or relating to the Agreement may only be brought on an individual basis and may not be resolved on behalf of a class, as a private attorney-general, or any other representative capacity. Grower shall not participate in or collect payment as a result of any class, collective, or other representative action of any kind against Corteva.

12.12 Jurisdiction and Governing Law: The interpretation and enforcement of the Agreement shall be governed by the laws of the State of Iowa without regard to its choice of law provisions. THE PARTIES CONSENT TO THE SOLE AND EXCLUSIVE JURISDICTION AND VENUE OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA, CENTRAL DIVISION AND THE DISTRICT COURT OF THE COUNTY OF POLK, IOWA, FOR ALL CLAIMS AND DISPUTES ARISING OUT OF OR CONNECTED IN ANY WAY WITH THIS AGREEMENT AND/OR THE USE OF THE SEED OR THE TECHNOLOGY. THE PARTIES WAIVE ANY OBJECTION TO VENUE IN THE CENTRAL DIVISION OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA, INCLUDING THOSE BASED, IN WHOLE OR IN PART, ON THE DIVISIONAL VENUE LOCAL RULE(S) OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA.

12.13 Grower and Corteva unconditionally waive any right to trial by jury in any action, proceeding or counterclaim in any way arising out of, or relating to, the Agreement.

12.14 Enforcement Costs: Grower agrees that Corteva and any owners of the patents covered by the Agreement shall be entitled to recover its costs or expenses, including, but not limited to, court costs or reasonable attorneys' fees, it incurs in enforcing its rights under the Agreement if the Grower is determined to be at fault.

ADDENDUM TO THE CORTEVA AGRISCIENCE TECHNOLOGY USE AGREEMENT FOR ENLIST-CONTAINING PRODUCTS

2026 Growing Season / Document valid through December 2026 / Addendum Portion of this Agreement Must Be Renewed Annually

Thank you for your purchase of Enlist® crops. This 2026 Addendum ("2026 Addendum") to the Corteva Agriscience TECHNOLOGY USE AGREEMENT ("TUA"), is entered into between Grower and Corteva Agriscience and sets forth additional terms and conditions, including, without limitation, additional product-specific stewardship requirements for the Enlist®-containing products. Grower agrees to follow and adhere to this 2026 Addendum with respect to Grower's use of Enlist-containing products in states and counties in the United States in which Enlist One® and Enlist Duo® herbicides are not registered for sale or use. All capitalized terms not otherwise defined in this 2026 Addendum shall have meanings ascribed to them in the TUA. This 2026 Addendum is incorporated into the TUA, and the TUA will govern with respect to any terms not specifically addressed in this 2026 Addendum.

Grower acknowledges and agrees as follows:

1. Enlist-containing products, including Enlist® Corn, Enlist® Corn - REFUGE, Vortec® Enlist®, PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, PowerCore® Ultra Enlist®, PowerCore® Ultra Enlist® Refuge Advanced®, SmartStax® Enlist® and SmartStax® Enlist® Refuge Advanced® corn Seed are available for sale in certain states and counties where Enlist One and Enlist Duo are not registered for sale or use. States where Enlist One and Enlist Duo are not registered include; Alaska, California, Connecticut, Hawaii, Idaho, Massachusetts, Maine, Montana, New Hampshire, Nevada, Oregon, Rhode Island, Utah, Vermont, Washington and Wyoming. Grower will verify with the U.S. EPA and Grower's state pesticide regulatory agency to determine if an Enlist herbicide product is registered for sale or use in Grower's state or county.
2. **GROWER AGREES TO NOT SPRAY ANY ENLIST HERBICIDE OR 2,4-D OR 2,4-D-CONTAINING PRODUCT OVER THE TOP OF ENLIST-CONTAINING PRODUCTS IN ANY STATE OR COUNTY WHERE ENLIST ONE AND ENLIST DUO ARE NOT REGISTERED FOR SALE OR USE.**
3. **IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY 2,4-D-CONTAINING PRODUCT ON ENLIST CROPS, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. OFF-LABEL USE OF HERBICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, ENLIST HERBICIDES OR 2,4-D-CONTAINING PRODUCTS NOT REGISTERED FOR USE WITH ENLIST CROPS IN YOUR STATE OR COUNTY, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES.**
4. Grower agrees to follow and adhere to any additional stewardship requirements communicated to Grower by Corteva, including keeping and maintaining records of the field location of Grower's Enlist crops and spray records for all herbicide applications undertaken by or on behalf of Grower. Corteva shall have the right, upon reasonable notice to Grower, to audit Grower's records and activities under this 2026 Addendum to verify Grower's compliance with its terms, stewardship requirements, and applicable laws and regulations. Grower agrees to provide to Corteva documentation related to field location, spray application records, or other information to confirm compliance with the Agreement, the Guide, and this 2026 Addendum.
5. **GROWER WILL INDEMNIFY, DEFEND, AND HOLD CORTEVA HARMLESS FROM, AND BE SOLELY RESPONSIBLE FOR, ANY LOSSES, CLAIMS, DAMAGE, AND/OR INJURY TO PERSONS AND PROPERTY, RELATED TO, ARISING OUT OF, OR PERTAINING TO ANY USE OR APPLICATION OF ANY 2,4-D HERBICIDE PRODUCT ON ANY ENLIST SEED PRODUCT.**
6. Grower will immediately notify Corteva if Grower is unable to comply with or perform all activities required under this Addendum, the Guide, or the TUA for any reason. Corteva reserves the right to revoke Grower's TUA and/or this 2026 Addendum for Grower's non-compliance with the TUA, Guide, or this 2026 Addendum.

By signing below, Grower acknowledges the legal and stewardship requirements associated with planting Enlist-containing products in the states or counties listed in www.enlist.com. This 2026 Addendum must be separately renewed each year that Enlist-containing products are purchased/planted in these states or counties. By signing below, the undersigned represents and agrees that: (1) he/she is eighteen (18) years of age or older; (2) he/she has read and understands the terms and conditions of this Addendum and the TUA, including, without limitation, the terms and conditions set forth in the documents linked to the TUA via hyperlinks; (3) he/she is fully authorized to legally bind and to enter into the 2026 Addendum on behalf of the Grower identified in the Grower Information box of the TUA; and (4) the terms and conditions of the 2026 Addendum are legally binding on the Grower and all individuals and entities that will plant and grow crops from Seed on behalf of the undersigned and the Grower. This 2026 Addendum to the TUA may be executed in any number of counterparts, including facsimile or scanned PDF documents. Each such counterpart, electronic signature, facsimile or scanned PDF document shall be deemed an original instrument, and all of which, together, shall constitute one and the same executed 2026 Addendum to the TUA. In addition, this 2026 Addendum may be executed by providing an electronic signature under the terms of the Electronic Signatures Act, 15 U.S.C. §§ 7001 et. seq., and may not be denied legal effect solely because it is in electronic form or permits the completion of the business transaction referenced herein electronically instead of in person.

Notes

ExpressSun®
trait

IMI
Tolerant

Always follow grain marketing, stewardship practices and pesticide label directions in accordance with the Product Use Guide (PUG) or other product-specific stewardship requirements including grain marketing and pesticide label directions. Varieties with the Glyphosate Tolerant trait (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Corteva Agriscience (or its chemical company partners) shall have no liability whatsoever for any losses or damages resulting from, or related to, or in connection with, (a) the use of incorrect herbicides applied to sunflower hybrids that contain the herbicide tolerant traits or (b) non-compliance with any of the other instructions set forth above, and all such liability is hereby expressly disclaimed by Corteva Agriscience and waived by you. If you have any questions on anything outlined in this document or would like additional information please contact your local sales professional.

Corteva, Inc. (NYSE: CTV) is a publicly traded, global pure-play agriculture company that combines industry-leading innovations, high-touch customer engagement and operational execution to profitably deliver solutions for the world's most pressing agriculture challenges. Corteva generates advantaged market preference through its unique distribution strategy, together with its balanced and globally diverse mix of seed, crop protection, and digital products and services. With some of the most recognized brands in agriculture and a technology pipeline well positioned to drive growth, the company is committed to maximizing productivity for farmers, while working with stakeholders throughout the food system as it fulfills its promise to enrich the lives of those who produce and those who consume, ensuring progress for generations to come.
