This summary sheet provides information on tank mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

Important Note: Do not use any tank mix if the mixture cannot be applied within the recommendations for individual products or if specific tank mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank mix request please contact your local Corteva representative or call the Hotline on 0800 689 8899.

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

KEY:

*Nevada can be sequenced or tank mixed with other florasulam products provided the maximum dose of florasulam does not exceed 7.5 g.a.i/ha of which no more than 3.75 g.a.i/ha is applied before 1st February.

†Add trace element first

UPDATES:

February 2025: Removed: Foundation, Prompt, Permasect; Added: Broadway Ultra, Gartrel & multi-way Herbicide + Fungicide mixes; August 2025: Added BlueN; September 2025: Removed Quantum SX; October 2025: Added Luxinum co-packs, Octavian Met, Maple DF, Stomp Aqua, Sven and Tower mixes; 7th Jan 2026: updated web address; 2nd April 2026 - removed Gartrel, added Boxer, Nutri-phyte PGA, Velogy Plus, Inatreq mixes

**USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
FOR FURTHER INFORMATION INCLUDING WARNING PHRASES AND SYMBOLS PLEASE REFER TO THE PRODUCT LABEL**

3C Chlormequat 750	Canopy	Moddus

TRACE ELEMENTS ^a add trace element first		
Bortrac (3.0 l/ha)	Maize Boost (5.0 l/ha)	Photrel (3.0 kg/ha)
Coptrel (0.5 l/ha)	Mancozin (2.0 l/ha)	Rapitrel (3.0 l/ha)
Croplift (5.0 kg/ha)	Mancuflo (2.0 l/ha)	Safe N 300 (10 l/ha)
Ferleaf (1.0 l/ha)	Mantrac (1.0 l/ha)	SMART ATS
Foliar Potash (10 l/ha)	Mantrac DF (3.0 kg/ha)	SMART Magiik Manganese
FMC MNS00^a	Maple DF (5.0 kg/ha)	SMART Manganese
FMC Zinc^a	Master Magnesium + TE ^a	Stopit (10 l/ha)
FMC Jett^a	Master Manganese Plus	Sulphur F3000 (10 l/ha)
Liquid Manganese 15%	MaxMan 400	Zintrac 700 (1.0 l/ha)
Magflo 300 (4.0 l/ha)	Nutri-phyte PGA	
Magphos K (10 l/ha)	Phosamco (3.0 l/ha)	

BIOSTIMULANTS		
BlueN		

COMBINATION MIXES		
FUNGICIDES PLUS PLANT GROWTH REGULATORS		
Proline + Chlormequat ^a		

This summary sheet provides information on tank mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

Important Note: Do not use any tank mix if the mixture cannot be applied within the recommendations for individual products or if specific tank mix restrictions apply. **When applying tank mixes on oat crops be careful of applications on light soils, dry soils and stressed crops (especially those with low Nitrogen levels) or soft lush crops.**

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank mix request please contact your local Corteva representative or call the Hotline on 0800 689 8899.

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

NOTES:

^aNevada can be sequenced or tank mixed with other florasulam products provided the maximum dose of florasulam does not exceed 7.5 g.a.i./ha of which no more than 3.75 g.a.i./ha is applied before 1st February.

^bAdd trace element first

^cOnly tested on winter oats, no information regarding crop safety or efficacy is available for spring oats.

UPDATES:

February 2025: Removed: Foundation, Prompt, Permasect; August 2025: Added BlueN; September 2025: Removed Arizona; 7th January 2026: updated web address; 2nd April 2026 - removed BiPlay SX & Traton SX, added Maple DF & Nutri-phyte PGA

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
